# BODMIN HILL

## Bodmin Hill - Tree Report Actions

T028	Prune to provide sufficient clearance from the adjacent overhead services and streetlight. Crown reduction to reduce height by up to 1.5m and the spread from 1.5 - 2.5m depending on available pruning points and to provide a min of 1m clearance from overhead services and streetlight. Pruning wounds are to be below 50mm in diameter when measured across the cut surface
T029	Northeastern lower branches laterally reduced to provide a min of 1.5m lateral clearance between branch tips and adjacent overhead services
T030	Remove basal epicormic growth
T031	Remove basal epicormic growth
